Lab Meeting Presentation

2019-07-25

# (Still) merging phenotypes

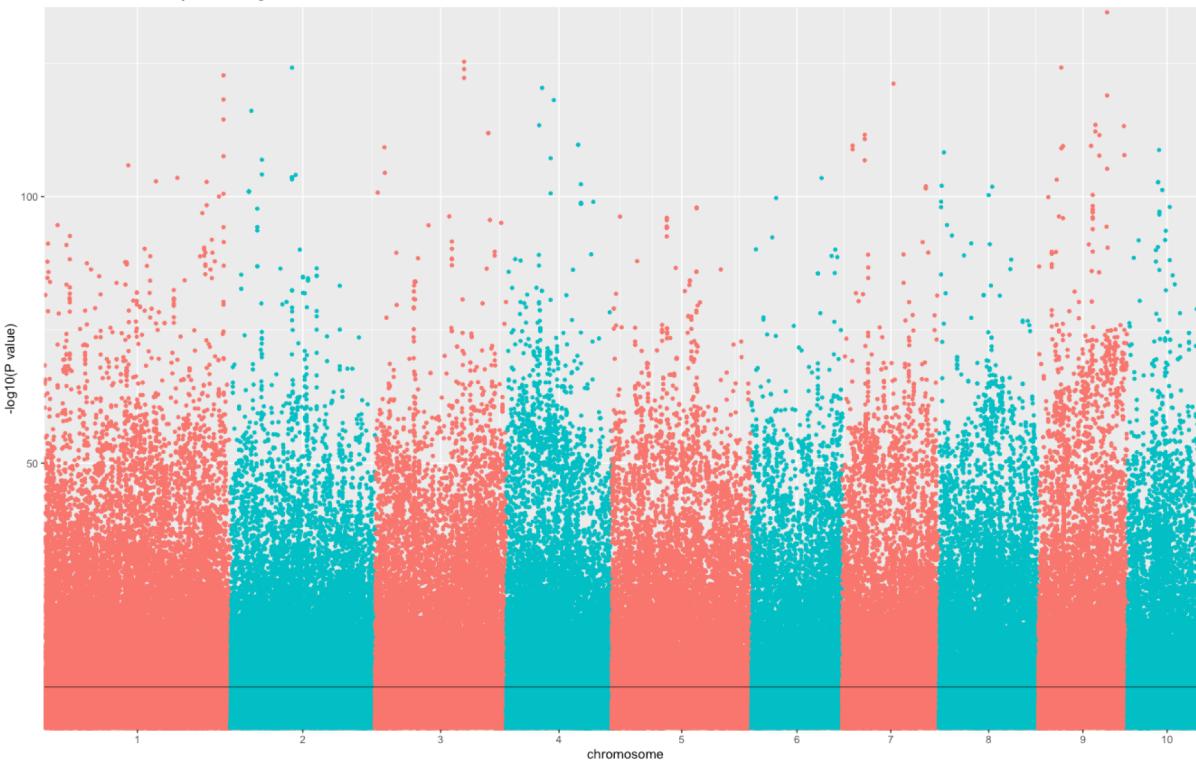

Population	N	# Phenotypes
NAM	5182	463
282 Association Panel	282	4301
Ames Diversity Panel	2648	22
IBM	302	TBD

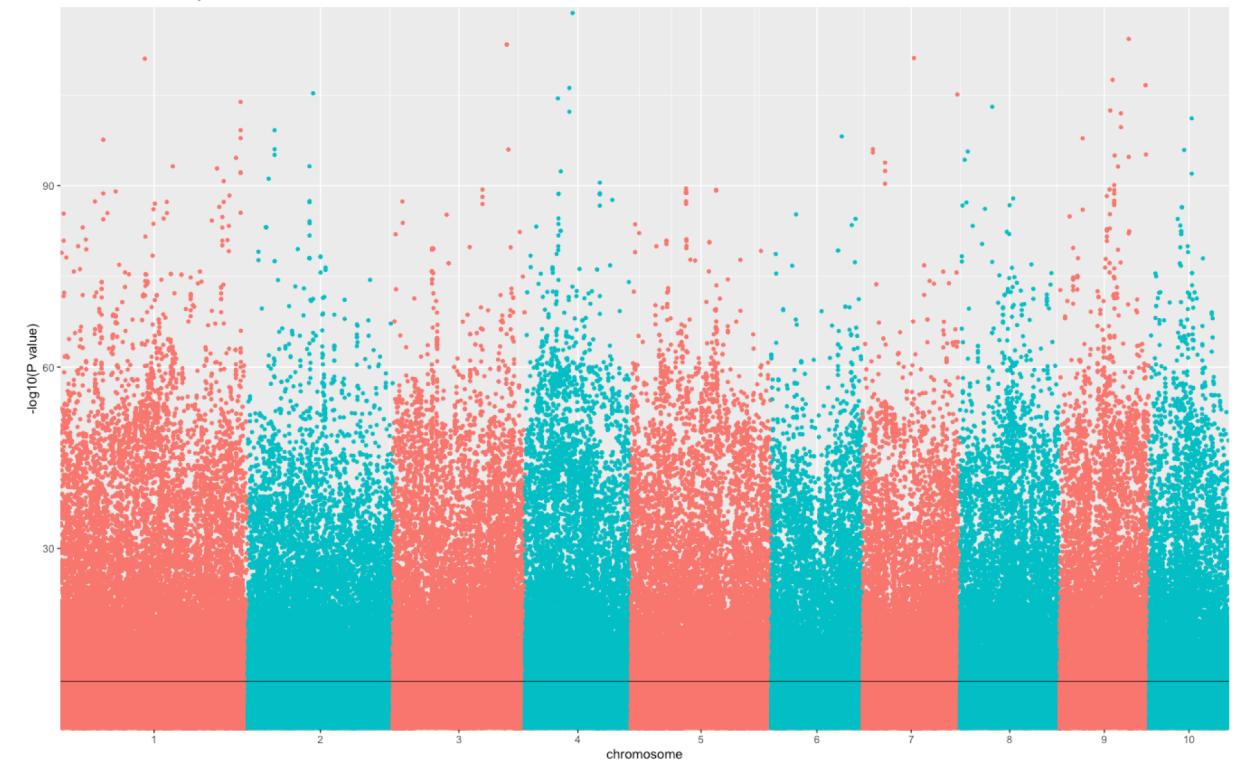

# GLM on NAM flowering time traits

Site Min Count = 2000  
Min Allele Freq = 0.02  
Class Size = 10  
MDS PCs = 5  
Taxa = 4763  
Sites = 441,264

GWA results for Days to Silking in NAM

GWA results for Days to Anthesis in NAM

Too much population structure still!  
Testing with family as a covariate (no PCs)

# GLM on NAM flowering time traits

Modifying parameters - rerunning

Site Min Count = 2000

Min Allele Freq = 0.01

Class Size = 10

~~MDS PCs = 5~~

Families as factors

Taxa = 4763

Sites = 441,264

Too much population structure still!

Testing with family as a covariate (no PCs)
